

YOGESH S

Data Scientist | AI & Data Science Engineer

+91 7871909047 · syogesh.16506@gmail.com · linkedin.com/in/yogesh-s-617334378 · github.com/Yogesh-016 · yogesh-016.github.io ·

SKILLS

Languages

Python, SQL
ML & DS
Scikit-learn, Pandas, NumPy, Regression, Classification, NLP, Deep Learning, Feature Engineering
Visualization

Power BI, Matplotlib, Seaborn, Excel (Advanced)
Databases

MySQL, Data Preprocessing, Data Cleaning
Tools

Git, GitHub, Jupyter, VS Code, Google Colab, TensorFlow

EDUCATION

B.Tech — AI & Data Science
Dhanalakshmi College of Engineering
2023 – 2027 | Chennai, Tamil Nadu
ML, Data Mining, Deep Learning, DBMS

Higher Secondary (12th Grade)
Tamil Nadu State Board
2022 – 2023

CERTIFICATIONS

- Python for Data Science — NPTEL (2025)
- Data Analyst Foundation — Udemy (2026)
- SQL for Data Analysis — Kaggle (2026)
- Power BI for Business — Microsoft (2026)
- Data Analytics Simulation — Deloitte · Forage (2026)

LANGUAGES

English
Professional ●●●●●

Tamil
Native ●●●●●

ACHIEVEMENTS

- 6+ end-to-end ML & data analytics projects
- 14 GitHub repositories across AI/ML & web dev
- 5 industry certifications in 2 years

SUMMARY

As a final-year B.Tech student in AI & Data Science, I am passionate about utilizing my skills in Python and machine learning to drive insights from data. With a solid foundation in predictive analytics and experience through internships and projects, I strive for excellence in transforming complex data into actionable strategies.

EXPERIENCE

Data Science Intern

CodeAlpha

01/2026 – 12/2026 | Chennai, Tamil Nadu, India

- Built automated data pipelines reducing data processing time by 40% using Python and Pandas.
- Performed EDA on 50K+ records to uncover patterns, improving model input quality and feature selection accuracy.
- Assisted in deploying ML models achieving 87% predictive accuracy on test datasets.

Data Analyst Intern (Job Simulation)

Deloitte · Tata · Forage

01/2026 – 12/2026 | Chennai, Tamil Nadu, India

- Analyzed 7 structured business datasets in Excel and Python to identify content performance trends.
- Built Power BI dashboards tracking 5 key KPIs, enabling data-driven recommendations adopted by the project team.

PROJECTS

Plant Disease Detection

CNN Deep Learning Hugging Face

- Developed a CNN-based image classification system detecting plant diseases with ~97% accuracy on 38 classes.
- Deployed on Hugging Face Spaces for real-time inference; trained on PlantVillage dataset using MobileNetV2.

Customer Churn Prediction

Python Scikit-learn Random Forest

- Built Random Forest + Logistic Regression classifier predicting churn with 88% accuracy on 10K+ records.
- Applied feature engineering; identified contract type and tenure as top churn predictors.

Sentiment Analysis

NLP TF-IDF SVM

- Built NLP pipeline with tokenization, stop-word removal, TF-IDF vectorization; 89% accuracy using SVM.
- Compared Naive Bayes and SVM classifiers across 15K+ labeled text samples.

Sales Performance Dashboard

Power BI SQL DAX

- Designed interactive Power BI dashboard with 6 KPI panels tracking regional sales and YoY growth across 3 regions.
- Wrote optimized SQL queries reducing data retrieval time by 30%.

House Price Prediction

Python XGBoost Scikit-learn

- Trained Linear Regression and XGBoost models on 13K+ records; reduced RMSE by 22% through feature scaling.

OBJECTIVE:

Final-year B.Tech student seeking Data Scientist / Data Analyst roles in India.
